

### CLIMATIC AND GEOGRAPHIC DESIGN CRITERIA

GROUND SNOW LOAD	WIND DESIGN		SEISMIC DESIGN CATEGORY	SUBJECT TO DAMAGE FROM			WINTER DESIGN TEMP	ICE BARRIER UNDERLAYMENT REQUIRED	FLOOD HAZARDS	AIR FREEZING INDEX	MEAN ANNUAL TEMP
	Speed (mph)	Topographic effects		Weathering	Frost line depth	Termite					
30 psf	See footnote 2	NO	B	Severe	30 in <sup>3</sup>	Slight to Mod	1°F	NO	DE <sup>1</sup>	1500	45°F

1. This information is available in the Development Engineering Division.
2. Wind speed design may be based on 90 mph 3 second gust or 80 mph sustained
3. Design to be 6 inches (152 mm) below the Frost line depth per Section 403.1.4.1
