

## **Shredded Paper, the reason it is not accepted at recycle plants**

Shredded paper, which has very little value at the paper mills, creates drastic difficulties during the sorting process at the recycle facilities. The shredded paper gets stuck in the expensive sorting machinery and causes damage to the machines.

If you have a document that is semi-confidential, tear it by hand a few times, and then throw it into the recycle container.

Please contact the City's Infrastructure Department at 720-977-6200 for more recycling information or if you have recycling tips you would like to share.
