

THE NATIONAL WEATHER SERVICE AND CITY OF THORNTON OFFICE OF EMERGENCY MANAGEMENT PRESENT A

WEATHER SPOTTER CLASS

For anyone interested in or concerned with severe weather and tornadoes in Colorado.

April 30, 2019, 6 - 9 p.m.
Thornton City Hall 1st Floor Training Room,
9500 Civic Center Drive, Thornton, CO 80229
Free

NWS Severe Weather Spotter Training prepares you to identify severe weather situations in your community. You'll become a strong resource within the community, providing early warning notifications to family, friends, businesses, and the National Weather Service.

You'll learn: severe weather safety techniques, how topography effects atmospheric conditions, cloud types and features, thunderstorm structure, how to identify potential tornado conditions, and severe weather warning systems and information flow.

Upon completion of the class you'll become an official member of the Colorado All-Season Spotter Team (CAST) and receive a weather spotter identification number and instructional information on providing real-time weather reports to the National Weather Service in Boulder, CO.
